SUMMARY

Full-stack software engineer and Software Engineering student at Addis Ababa University with a 5.0 Upwork client rating, a remote Shopify developer internship, and 20+ production repositories on GitHub. Proficient across the full stack from crafting responsive React and Flutter frontends to architecting scalable Node.js backends with PostgreSQL. Experienced in headless e-commerce development with Shopify Hydrogen and GraphQL, with an enduring focus on clean architecture, real-world problem solving, and dependable systems.

WORK EXPERIENCE

FREELANCE FULL-STACK DEVELOPER

Upwork | 2026 - Present

- Architect and ship end-to-end full-stack web applications across responsive interfaces, serverless APIs, and relational databases for international clients.
- Maintain a 5.0 client satisfaction rating across completed freelance contracts.
- Manage full project lifecycles encompassing technical scoping, database modeling, API architecture, and production cloud deployment.

SHOPIFY DEVELOPER INTERN

Torosachi Development Team | March 2026 - August 2026

- Engineered headless e-commerce storefront features using Shopify Hydrogen, Remix, and Tailwind CSS.
- Integrated dynamic product catalogs, cart management, and checkout pipelines with Shopify Storefront API and Admin API.
- Collaborated remotely with the core development team using Git version control and structured pull request reviews.

SOFTWARE ENGINEERING VIRTUAL EXPERIENCE

Commonwealth Bank, via Forage | March 2026

- Modified an existing .NET backend and React/Redux frontend to implement client-requested enterprise features.
- Authored unit test suites to validate logic changes and created structured pull requests for peer review.
